KEYWORDS

KEYWORD GLOSSARY

+/- DICE: Dice that are added to Success Rolls. If the Keyword applies to a Weapon, the dice are only added to Success Rolls for Attacks made with it.

+/- INJURY DICE: Dice that are added to Injury Rolls. If the Keyword applies to a Weapon, the dice are only added to Injury Rolls for Attacks made with it.

+/- INJURY MODIFIER: Modifiers that are applied to the result of an Injury Roll. If the Keyword applies to a Weapon, the modifier is only added to Injury Rolls for Attacks made with it.

ACTION: An activity a model can carry out when it is Activated. Common ACTIONS include Move, Dash, Shoot, and Fight.

ASSAULT: Ranged Attacks made with Weapons that have this Keyword do not prevent a model from taking a Charge or Fight ACTION during the same Activation.

BLOOD MARKER: BLOOD MARKERS are placed on models that suffer an injury.

CRITICAL: Add +2 INJURY DICE instead of +1 INJURY DICE when a Critical Success is rolled for an attack made by a Weapon with this Keyword.

CUMBERSOME: Weapons with this Keyword require two hands to use, even if the model has the STRONG Keyword. However, they can still be used alongside a Shield with the Shield Combo Stipulation.

ELITE: The most senior and heroic models in a Warband.

FEAR: Add -1 DICE to a Melee Attack that targets a model with this Keyword. Models that cause FEAR are immune to FEAR themselves.

HERETIC: The model is a member of the Heretic Legions Faction.

RISKY: If you must make a Success Roll for a model that is using a piece of Battlekit that has this Keyword, then the Success Roll becomes a Risky Success Roll (the model's Activation will end if the Success Roll is a Failure). For example, the Success Roll for an attack made with a Weapon that has the RISKY Keyword would become a Risky Success Roll. This Effect is ignored if the Success Roll is already a Risky Success Roll.
