1.0.2

Trench Crusade 1.0.2 Changelog

This document lists all of the important changes that were made as part of the 1.0.2 Rules Update. It does not include minor changes that do not affect how the game is played, such as spelling mistakes, capitalisation of words, extra spaces, renamed abilities or special rules, and so on.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
14	CORE RULES, before 1st sentence	Add the following new paragraph: The first section of the rulebook is called the Core Rules, and explains how to play Trench Crusade in a quick and easy to use format. The Core Rules are followed by the Comprehensive Rules section, which provides more detailed explanations of the rules and additional information about how they work. If you are using the Core Rules and encounter a situation that you are not sure how to resolve, read the Comprehensive Rules to find the answer.
14 & 34	ACTIONS > Move.	Add the following sentence to the end of the Move rule: A Move ACTION cannot be used to move a model within 1" of an enemy model (you must use a Charge ACTION instead).
14	ACTIONS > Retreat	Change to: Taking a Retreat ACTION with a model allows you to make a special type of move, called a retreat, that is used when a model is within 1" of an enemy model and wishes to move away. Before you make, or are forced to make, a retreat move with a model, your opponent can take a Fight ACTION with each enemy model that is within 1" of the retreating model. When a model attacks a retreating enemy model, it can only make 1 melee attack with 1 weapon (it cannot use the Multiple Melee Attacks rule, but if the attacking weapon has the CLEAVE (X) Keyword it will still apply). After carrying out the attack(s) you can move the retreating model as long as it did not suffer a Down or Out of Action result (> see Injury Rolls). A retreating model must end its retreat move more than 1" away from all enemy models. If this is impossible, it cannot move at all. Note that redeploying a model does not count as a retreat move.
20	Down Results, 3rd bullet point	Change to: Until the model stands back up, it cannot be moved for any reason unless it falls.
30	Measuring Distances	Add the following subsection after the first paragraph and before "Within": In Contact Two models are in contact if any part of the models and/or their bases are in contact. A model is in contact with a terrain piece if any part of the model and/or its base is in contact with the terrain piece.
30	Line of Sight	Change to: You will often need to check to see if a model has a "Line of Sight" to another model or terrain piece. If you are unsure whether a model has a Line of Sight to a target, stoop down and take a look from behind the attacking model and check if it can see any part of the target model (do not count the target's base, its hands or feet, or anything that is carried by or attached to the target such as a weapon or banner), or any part of a target terrain piece. Models can see all around (i.e. 360") and they may be pivoted to face any direction before the Line of Sight is checked. "Partial Line of Sight" A model that has a Line of Sight to a model is said to have a partial Line of Sight if it can draw a Line of Sight to part of the target model but not all of it.
30	Other Rules Principles, after Line of Sight	Add the following paragraph after LINE OF SIGHT: POINTS ON THE BATTLEFIELD OR TERRAIN PIECES You may also need to check Line of Sight to a point on the battlefield or on a terrain piece. When this is the case, the point is considered to be 1mm across and 1mm high, and you have a Line of Sight to it if you can see any part of it.
31	Model Placement, 2nd sentence	Change to: You can set up a model so that part of its base is on the battlefield or in terrain and the rest of its base is "in the air", as long as more than half of the model's base is on the battlefield or in terrain.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
37	Retreating	Change to: Taking a Retreat ACTION with a model allows you to make a special type of move that is used when a model is within 1" of an enemy model and wishes to move away. Before you make, or are forced to make, a retreat move with a model, your opponent can take a Fight ACTION with each enemy model that is within 1" of the retreating model. After carrying out the attack(s), you can move the retreating model as long as it did not suffer a Down or Out of Action result (► see Injury Rolls). A retreating model must end its retreat move more than 1" away from all enemy models. If this is impossible, it cannot move at all.
38	Terrain Types	Change to: Open: Open terrain includes any area where there is nothing to impede a model. It is the most common terrain in Trench Crusade. Models can be moved freely across Open terrain. * Difficult: Difficult terrain includes rock beds, swamps, barbed wire and so on, and has the DIFFICULT TERRAIN Keyword (► see DIFFICULT TERRAIN). * Dangerous: Dangerous terrain includes barbed wire, minefields, raging fires, areas of poisonous gas, and so on, and has the DANGEROUS TERRAIN Keyword (► see DANGEROUS TERRAIN). * Impassable: Impassable terrain includes cliffs, large monuments on which there is nowhere for a model to stand, pools of magma, and so on, and has the IMPASSABLE TERRAIN Keyword (► see IMPASSABLE TERRAIN). * Cover: A model has the COVER Keyword from another model if it is in contact with a terrain piece that is at least ½" high and at least as wide as its base, and the terrain piece lies between it and the other model in such a way that it partially blocks the Line of Sight between the two models (► see Partial Line of Sight).
38	Moving Into Terrain	Change to: Moving into Terrain A model is said to be "in" a piece of terrain if more than half of its base is within the boundary of that piece of terrain.
41	Flying	Remove the Flying rule (see the FLYING Keyword instead).
45	Multiple Melee Attacks text	Change: MULTIPLE MELEE WEAPONS A model that has two Melee Weapons can use a single Fight ACTION to make two separate Melee Attacks, one with each Weapon, in the order of your choice. The Weapon used for the second attack is referred to as the Off-Hand Weapon (► see Melee Attack Modifiers below). You can pick the same or a different model as the target for each attack. If a model has two Melee Weapons, and one or both of them have the CLEAVE Keyword, pick one of them and make a Melee Attack with it; if it has the CLEAVE Keyword carry out all of its attacks one after the other. Then pick the other Melee Weapon and make a Melee Attack with it using the Off-Hand Modifier; if it has the CLEAVE Keyword carry out all of its attacks out one after the other with the Off-Hand modifier.
46	Injury Rolls	Add the following line to the end of this section: Note that if a rule says a model is taken Down or Out of Action, apply the appropriate Result from the Injury Roll Table in full (which means a model that is taken Down will have a BLOOD MARKER placed beside it).
47	Bloodbath Rolls	Change to: When you make an Injury Roll for an enemy model, you can spend 6 BLOOD MARKERS (or 3 BLOOD MARKERS if the target is Down) to convert the Injury Roll to a Bloodbath Roll. To make a Bloodbath Roll, roll 3D6 and add all 3 dice together. Add +/- INJURY DICE and +/- INJURY MODIFIERS in the same way you would to an Injury Roll, except that you pick the 3 highest or 3 lowest dice in the roll, instead of the 2 highest or lowest. If the Injury Roll has the DEADLY Keyword, instead roll 4D6 and add all 4 dice together.
49	Down Results, 4th bullet point	Change to: Until the model stands back up, it cannot move for any reason unless it falls.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
49	Down Results, last bullet point, 2nd sentence	Change to: Take a Success Roll for the model before it is taken Down.
52	Keyword Glossary, first paragraph	Change to: Rules governing all Keywords in the game are listed here. A model, a piece of Battlekit, a Marker or a terrain piece can have 1 or more Keywords. They define the core abilities, rules, troop types, and damage categories in the game. Keywords appear in the rules in CAPITALS to make it easy for you to spot them.
52	New Keyword	AMMUNITION (KEYWORD) (Effect): If a model has a piece of Battlekit with this Keyword, it will use it in the next game that it takes part in. When the model is deployed, say which Ranged Weapon the Battlekit will be used for. It gains the (KEYWORD) until the end of the game. The Ranged Weapon you choose cannot have the BLAST, FIRE, GAS, or SHRAPNEL Keywords, and cannot have more than one type of AMMUNITION.
52	ARMOUR PIERCING Keyword	Change to: A Weapon with this Keyword reduces the target's total -INJURY MODIFIER from its Armour Characteristic, and/or any Armour or Shields it has, by 1, to a minimum of 0. For example, if a target had Standard Armour and a Trench Shield, the -INJURY MODIFIER would be lowered from -2 to -1.
53	AUTOMATIC Keyword, 1st sentence	Change to: When you take a Shoot ACTION with a Ranged Weapon that has this Keyword, you can make a number of Ranged Attacks with this weapon equal to X, one after another.
53	BLAST Keyword	Change to: BLAST (X") (Effect): A Ranged Weapon with BLAST (X") has a blast radius in inches equal to X (including vertically). When you make an attack with the Weapon, you must pick a target for the attack. The target can either be an enemy model or a visible point on the battlefield or on a terrain piece; whichever you choose must be within the attacking model's Line of Sight and the Weapon's range. If the Success Roll for the attack is a Failure, the attack misses and nothing happens unless the weapon also has the SCATTER Keyword (> see SCATTER). If the Success Roll for the attack is a Success or Critical Success, every model that has a Line of Sight to the target of the attack and which is within the Weapon's blast radius is hit. In addition, friendly models that are within 1" of an enemy model that was hit by the blast radius are also hit. Measure the blast radius from the centre of the target model's base, or the centre of the visible point you picked, to the closest point on the other model's base. Make an Injury Roll for every model that was hit. If you roll a Critical Success, only add the extra INJURY DICE to the roll for a model if it was chosen as the target of the attack.
53	New Keyword	Add the following new Keyword: CLEAVE (X) (Effect): When you take a Fight ACTION with a Weapon that has this Keyword, you can make a number of Melee Attacks with this weapon equal to X, one after another. The attacks can target different enemy models, as long as they are all within 1" of the model taking the Fight ACTION. Resolve each attack one at a time, using steps 2 to 4 of the Melee Attack Sequence. Any BLOOD MARKERS that are spent only modify the Injury Roll for the attack they are spent on, and do not modify Injury Rolls for subsequent attacks.
54	New Keyword	Add the following new Keyword: DANGEROUS TERRAIN (Effect): If you Activate a model that is in terrain with this Keyword, or if you move a model into terrain with this Keyword during a move, you must take a Risky Success Roll for the model. If the roll is a Success or Critical Success, you can carry on with the model's move, and you do not have to take any more Risky Success Rolls for the model if it moves into any more terrain with this Keyword as part of that move. If the roll is a Failure, you must make an Injury Roll for the model and its Activation ends. Sometimes DANGEROUS TERRAIN will have one or more Keywords in brackets directly after it. Any Injury Rolls caused by the DANGEROUS TERRAIN rule have those Keywords. For example, if a terrain piece had the DANGEROUS TERRAIN (FIRE) Keywords, then any Injury Rolls caused by it would count as having the FIRE Keyword.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
54	New Keyword	Add the following new Keyword: DEADLY (Effect): When you make an Injury Roll for an attack made with a weapon with this Keyword, roll 3D6 and add all 3 dice together. Any +INJURY DICE or INJURY DICE are added to the roll normally, except that you pick the 3 highest or lowest dice in the roll instead of the 2 highest or lowest.
54	New Keyword	Add the following new Keyword: DEPLOYABLE (Tag): Battlekit that is represented by a model or terrain piece that can be set up during the game.
54	New Keyword	Add the following new Keyword: DIFFICULT TERRAIN (Effect): Every 1" a model is moved across terrain with this Keyword counts as 2".
54	FIRETEAM Keyword	Add: A model cannot be in more than 1 Fireteam.
55	New Keyword	Add the following new Keyword: FLYING (Effect): When you make a move, retreat move or charge move with a model with this Keyword, you can measure the path on which it travels 'through the air'. It must end the move on the battlefield or on a terrain piece. You must still take a Risky Success Roll for the model if it is Activated or ends its move on Dangerous terrain, and it cannot end its move on Impassable terrain. In addition do not make an Injury Roll if a model with this Keyword Falls.
55	New Keyword	Add the following new Keyword: IMPASSABLE TERRAIN (Effect): Models cannot be moved onto or across terrain with this Keyword.
57	New Keyword	Add the following new Keyword: MINED (Effect): When a model moves into contact with a Marker or terrain piece with the MINED Keyword, the mine will detonate unless the model has the NEGATE MINED Keyword. Make an Injury Roll with the SHRAPNEL Keyword for the model that detonated the mine, and then the Marker or terrain piece loses the MINED Keyword. If the model that detonated the mine wasn't taken Down or Out of Action, it can then continue its move. Models with the FLYING Keyword only detonate a mine if they finish a move in contact with a MINED terrain piece (they can fly across it without setting it off).
56	New Keyword	Add the following new Keyword: REGENERATE (X) (Effect): When you Activate a model with this Keyword, before carrying out any ACTIONS, you can remove up to X BLOOD MARKERS from the model.
57	RISKY Keyword	Change to: RISKY (Effect): If you must make a Success Roll for a model that is using a piece of Battlekit that has this Keyword, then the Success Roll becomes a Risky Success Roll (the model's Activation or ACTION will end if the Risky Success Roll is a Failure). For example, the Success Roll for an attack made with a Weapon that has the RISKY Keyword would become a Risky Success Roll. This Effect is ignored if the Success Roll is already a Risky Success Roll.
57	SCATTER Keyword	Change to: SCATTER (Effect): Some Weapons with the BLAST Keyword also have the SCATTER Keyword. When you make an attack with the Weapon, pick a target and carry out the attack as described in the rules for BLAST. However, if the Success Roll for the attack was a Failure, the attack will scatter instead of missing. To see where it scatters to, subtract the Success Roll from 7. For example, if the Success Roll was 4, then the target point would scatter (7-4=) 3". Your opponent must move the attack exactly that many inches in a direction of their choice, to a point on the battlefield, on a terrain piece, or on the base of a model. There must be Line of Sight between the point that is chosen and the original target for the attack. If this is impossible for any reason, then treat the attack as a miss. Then, determine who is hit as described in the rules for BLAST.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
57	SKIRMISHER Keyword	Change to: If an enemy selects a friendly model with this Keyword as the target of a charge, you can choose to evade with your model before the charge is made, as long as your model is not within 1" of an enemy. When a model evades, roll a D3 and move the model that many inches. It must finish this move more than 1" away from all enemy models. If the move results in there being an interposing model between the evading model and the model that is making the charge, then the charging model must choose the interposing model as the target for its charge.
57	STRONG Keyword, 2nd sentence	Change to: In addition, it can equip and use one 2-Handed Melee Weapon as if it were a 1-Handed Melee Weapon.
69	Battlekit Limits, 6th bullet	Change to: Any number of pieces of Equipment or Special Battlekit. A Model cannot have two or more pieces of Equipment or Special Battlekit with the same Name.
69	Two Hands, One Head and a Body boxout, final sentence	Change to: A model may freely switch between Ranged and Melee Weapons between ACTIONS, slinging unused weapons over the shoulder or stowing them in a holster or scabbard as needed.
80	Shields Introduction	Add: A Shield does not block Line of Sight to the model that is carrying it.
81	Armour-Piercing Bullets	Add AMMUNITION (ARMOUR-PIERCING) Keyword and delete special rule.
82	Dum-Dum Bullets	Add AMMUNITION (CRITICAL) Keyword and delete special rule.
82	Field Shrine	Add the DEPLOYABLE Keyword.
83	Incendiary Ammunition	Add AMMUNITION (FIRE) Keyword and delete special rule.
85	Tracer Bullets	Add AMMUNITION (+1 DICE) Keyword and delete special rule.
89	LEARNED SAINT, Knowledge of Science, 1st sentence	Change to: The limit of one item of Battlekit (excluding Glory Items) is increased by 1 if a model with this Skill is part of the Warband.
89	LEARNED SAINT, Logistical Skills, 1st sentence	Change to: A Warband that includes a model with this Skill can increase any Limits on the number of models it can include by 1, as long as the model does not have the ELITE Keyword, is not mounted on a 50mm or larger base, and is not a Mercenary.
91	SUBLIME GATE, Imported Wares	Imported Wares: You can purchase 1 Weapon or 1 suit of Armour from the New Antioch Armoury for a model with this Skill in the following Quartermaster Step. Choose the Weapon or suit of Armour and write down your choice on your Warband Roster. If this item is lost for any reason during the campaign, you can repurchase it.
91	SUBLIME GATE, Sultan's Favour, 1st sentence	Change to: A Warband that includes a model with this Skill can increase any Limits on the number of models it can include by 1, as long as the model does not have the ELITE Keyword, is not mounted on a 50mm or larger base, and is not a Mercenary.
92	ORDER OF THE FLY, Wings of the Fly	Change to: A model with this Skill gains the FLYING Keyword if it doesn't already have it.
93	MAMMON, Money Can Buy Anything, 1st sentence	Change to: The limit of one item of Battlekit (excluding Glory Items) is increased by 1 if a model with this Skill is part of the Warband.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
102	Captured, 2nd sentence	Change to: Before continuing the Trauma Step, you and your opponent from the game can negotiate a ransom price in ducats for the release of the model.
102	Head Wound Injury	Change to: This model can no longer gain Experience Points. You can assign Promotion Dice to this model as if it were a Troop in the Promotions and Experience Step. If one of its assigned Promotion Dice rolls a “6”, it regains the ability to gain Experience Points, although the Battle Scar remains.
104	Assign Promotion Dice	Change to: After you have filled the Promotion Dice Poll, you must assign the dice in the pool to the Troop models in your Warband that can be Promoted. You cannot assign a third dice to the same model until all Troop models in your Warband have at least 2 dice each, or assign a fourth dice until all Troop models have at least 3 dice each, and so on. Any Promotion Dice not assigned are lost.
104	Promoting a Model	Change to: When a Troop model receives a Promotion, they immediately gain the ELITE Keyword and they are considered to be an Elite model from then on, including for the rest of the Promotions and Experience Step. Cross out their old entry on your Warband Roster and write a new one for them in the Elite Models section. They begin with 0 Experience Points, but will gain at least 1 due to surviving the game after which they were Promoted.
107	Champion Skill	Change to: Melee Weapons that do not have the CLEAVE Keyword which are used by a model with the skill gain the CLEAVE 2 Keyword. In addition, add -1 DICE to the Success Roll for the second Melee Attack made with each Melee Weapon that gains the CLEAVE 2 Keyword.
108	Gunslinger	Change to: Gunslinger: The following rules apply to a model with this Skill if it is armed with Ranged Weapons with the PISTOL Keyword. If it is equipped with 2 Weapons with the PISTOL Keyword, it can take a Shoot ACTION with one and then immediately take a Shoot ACTION with the other. Add the ASSAULT and IGNORE OFF-HAND WEAPON Keywords to any weapons that have the PISTOL Keyword (unless they have them already).
110	Skill & Expertise	Change to: Skill & Expertise: When you give a model this Skill, choose 1 ACTION on that model’s Warband Entry, or 1 Common ACTION apart from Fight or Shoot ACTIONS, and write it on your Warband Roster. Add +1 DICE to rolls made as part of the chosen ACTION when they are taken by this model.
112	Reinforcement Sequence, step 6	Change to: If you Call for Reinforcements, you must forego the Exploration Step and Quartermaster Step completely. Go directly to the Roster Step.
125	Glory Items intro paragraph	Change to: Glory Items are pieces of Battlekit. They are similar in many ways to the Battlekit that can only be purchased with ducats that are found in the Armoury Tables of a Faction List. However, Glory Items can only be purchased during a campaign and if the Warband has made a discovery from an Exploration Table that allows them to take a Glory Item for free or purchase it in the Quartermaster Step. For example, the Trench Merchant discovery on the Common Exploration Locations Table allows a Warband to purchase Glory Items costing 5 glory or less.
128	Armour of the Fly Keywords	Add the FLYING Keyword.
129	Battlefield Title	Change Type to Special.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
129	Beelzebub's Embrace	Change Type to Special and change the Many-Legged Form special rule to: A model that has been blessed with Beelzebub's Embrace has its arms replaced with fly-like limbs. The model cannot have Weapons, Grenades, Shields or Equipment that has the HELD Keyword. It can make a Melee Attack with the CLEAVE 4 Keyword even though it doesn't have any Melee Weapons. If all 4 Melee Attacks successfully hit the same target model, and the target is mounted on a 32mm base or smaller, then the target is immediately taken Out of Action when it is hit by the fourth attack. Do not make an Injury Roll for the fourth attack, and any rules or abilities that would change the result do not apply (i.e. the TOUGH Keyword would not affect the fourth attack).
131	Damascus Armour, Type box on profile	Change Type from Equipment to Armour.
132	Ducal Winged Armour	Add the FLYING Keyword and change Type from Equipment to Armour.
133	Field Hospital	Change Type to Special and change the Field Hospital special rule to: A Field Hospital cannot be allocated to a model, but is added to your Arsenal. If your Warband also includes a Combat Medic, Jabirean Alchemist or a Sister of Saint Cosmas, at the end of the Trauma Step in the Campaign Phase you can use a Field Hospital to treat 1 model from your Warband that has 1 or more Battle Scars. If you do so, roll 2D6. On a roll of 7+ you can remove 1 of the model's Battle Scars; on a roll of 3-6 nothing happens; on a roll of 2 the model receives 1 extra Battle Scar.
134	Horn of Joshua, Blow Thy Horn	Add: Once a model has successfully taken a Blow Thy Horn ACTION, it cannot be used again in the same game.
135	Knighthood & Koraktor, the Great Tome of Hell	Change Type to Special.
137	Lordship of this World	Change Type to Special.
138	Piece of Silver and Resurrection Engine	Change Type to Special.
139	Rocket-Propelled Grenade and Salvage Golem	Change Type to Special.
140	Sniper Scope	Add: A Sniper Scope cannot be reallocated during the Quartermaster Step.
141	Tormentor Chain	Add the ASSAULT Keyword and change Dragged Forwards to: If an attack made with a Tormentor Chain is a Success or Critical Success, do not make an Injury Roll for the target. Instead, place 1 BLOOD MARKER next to the target, and then place a second BLOOD MARKER on the target because the Tormentor Chain has the SHRAPNEL Keyword. After placing the BLOOD MARKERS, you can move the target model up to 12" in a straight line, but you must move it so that it finishes the move as close as possible to the attacking model. This move can be used to make the model move within 1" of an enemy, make a retreat move, Climb, Jump, or Jump Down. The model cannot make a Diving Charge.
142	Trench Dog	Change Type to Special and add the DEPLOYABLE Keyword.
153, 163 & 177	Glorious Deeds, Hold Your Ground	Change to: Hold Your Ground: A Warband is the first to pass a Morale Check in this game. You receive a Victory Point for achieving this Glorious Deed. In a campaign game you can award 1 Experience Point to 1 ELITE model from the Warband that has the LEADER Keyword if you have one available, and you receive Glory Points and an extra D6 for your Promotion Pool as you would do normally.
153	Resist and Bite Glorious Deed	Change to: A friendly model that began its Activation Down takes an enemy model Out of Action in the same Activation.

Digital Rulebook Updates 1.0.2

Page	Location	Errata
155	Machine Gun Emplacement Marker	Add: Each Machine Gun Emplacement can be used once per Turn.
156	UNFORESEEN EVENTS, 2nd sentence	Change to: On a roll of 1-4 nothing happens, but on a 5 or 6, an Unforeseen Event takes place (do not roll again to see if any further Unforeseen Events take place).
159	DEPLOYMENT, 6th sentence	Change to: Models mounted on bases 40mm or larger count as 2 models for this purpose.
162	Mine Markers	Change to: After the defender sets up their Trenches, they can set up 12 Mine Markers within the Mine Placement Area. After setting the Mine Markers up, the defender must secretly write down which 4 of the Mine Markers are duds. All of the other Mine Markers are live and have the MINED Keyword and the following special rule. Slaughter Mines: As soon as a model moves within 3" of a Mine Marker, temporarily halt its move. The defender must then reveal if the Mine Marker is a dud. If it is, nothing happens. If it is a live mine, it detonates in the same way as if the model had moved into contact with a Marker with the MINED Keyword (► See MINED). The Mine Marker is removed, and the moving model can then continue its move as long as it wasn't taken Down or Out of Action. Models with the FLYING Keyword only trigger a Mine Marker if they finish a move in within 3" of it (they can fly across it without setting it off). It is possible for a single move to cause several mines to explode. When this is the case, the defender chooses the order in which the explosions occur. Completely resolve each explosion before moving on to the next one.
163, 177 & 194	Glorious Deeds, Victory or Death	Change to: * Victory or Death: A Warband wins the game. This Glorious Deed is only used in campaign games and is determined after the result of the game has been decided. You do not receive any Victory Points for achieving this Glorious Deed, but you can award 1 Experience Point to 1 ELITE model from the Warband that has the LEADER Keyword if you have one available, and you receive Glory Points and an extra D6 for your Promotion Pool as you would do normally.
176	Supply Cache Markers, last sentence	Change to: Only one Marker can be placed in the defender's Deployment Zone, and none can be placed within 12" of the attacker's Deployment Zone.
179	Ichor Pit Markers	Change the rule to: Open ground and terrain within 2" of the centre of the Ichor Pit Marker is treated as being Difficult and Dangerous terrain, in addition to any other terrain rules it may have. Each Ichor Pit contains enough Ichor to fill 6 Ichor Vials (see below). We recommend that you keep track of how many vials have been filled from a pit by putting a D6 on top of the Marker. An Ichor Pit with no Ichor left is no longer Dangerous Terrain.
186	No Escape Glorious Deed	Change to: A friendly model successfully charges an enemy model that it did not have a Line of Sight to at the start of its Activation.
189	Gas Mine Markers	Change to: After the defender sets up their Trenches, they can set up 12 Gas Mine Markers. At least 8 of the Gas Mine Markers must be placed wholly within the Mine Placement Area. Up to 4 can be played wholly within the defender's Deployment Zone. After setting the Gas Mine Markers up, the defender must secretly write down which 4 of the Gas Mine Markers are duds. All of the other Gas Mine Markers are live and have the MINED Keyword and the following special rules. Choking Mines: As soon as a model moves within 3" of a Gas Mine Marker, temporarily halt its move. The defender must then reveal if the Gas Mine Marker is a dud. If it is, nothing happens. If it is a live mine, it detonates in the same way as if the model had moved into contact with a Marker with the MINED Keyword, except that the INJURY counts as having the GAS Keyword instead of the SHRAPNEL Keyword (► see MINED). The Gas Mine Marker is then removed and replaced with a Gas Cloud Marker, and the moving model can then continue its move as long as it wasn't taken Down or Out of Action. Models with the FLYING Keyword only trigger a Mine Marker if they finish a move in contact with it (they can fly across it without setting it off). It is possible for a single move to cause several mines to explode. When this is the case, the defender chooses the order in which the explosions occur. Completely resolve each explosion before moving on to the next one.

Warbands of Trench Crusade Updates 1.0.2

Page	Location	Errata
13	Warband Entries, Base bullet point	Change to: The size of the base the model must be mounted on. If a model's Base Characteristic has a single number, the base is round and the number is its diameter. If a model's Base Characteristic has two numbers, the base is an oval, the smaller number is the width of the base and the larger number is the length of the base.
15-20	Keyword Glossary	Make the same changes as those made in the Keyword Glossary in the Digital Rulebook (see pages 52-57 of the Digital Rulebook Changelog).
23	Special Rules, Concentrated Attacks	Change to: If a model from a Fireteam hits a target that had been hit by an attack made by the other member of their Fireteam earlier in the same joint Activation, then you can spend 3 BLOOD MARKERS to convert the Injury Roll for the second attack to a Bloodbath Roll, even if the target is not Down.
32	Combat Engineer	Add the NEGATE MINED KEYWORD, add the Set Mine ability and change Defuse Mine as shown below: Set Mine ACTION: A Combat Engineer can take a Set Mine ACTION if they are in contact with a terrain piece that measures up to 8" by 8" that doesn't have the MINED Keyword. If they do so, take a Success Roll for the model and add +2 DICE to the roll. If the roll is a Failure, nothing happens. If the roll is a Success or a Critical Success, the terrain piece gains the MINED Keyword. Defuse Mine: When you move a Combat Engineer into contact with a Marker or terrain piece with the MINED Keyword, you can say the Combat Engineer will halt and try to defuse the mine before it detonates (► see MINED). If you do so, take a Risky Success Roll for the model. If the roll is a Failure, the mine detonates anyway and the Combat Engineer's Activation ends. If the roll is a Success or a Critical Success, the mine does not detonate and the Marker or terrain piece loses the MINED Keyword. A model that sets a mine on a terrain piece can defuse the mine automatically if it moves into contact with the terrain piece (do not take a Risky Success Roll).
35	Papal States, Lector special rule first paragraph	Change to: A Papal States Intervention Force Warband must include 1 Trench Cleric, but does not have to include a Lieutenant. A Trench Cleric in a Papal States Intervention Force Warband has the LEADER Keyword and the following additional ability:
35	Specialist Force	Change to: You have 500 Ducats and 11 Glory to recruit a Papal State Force Warband for a campaign (► see Starting a Warband). A Papal States Intervention Force gains 4 Glory each time it calls for Reinforcements. In a campaign, its Threshold Value is reduced by 200 Ducats. When recruiting models for a one-off game, after agreeing upon the size of the game, reduce the amount of Ducats a Papal States Intervention Force Warband has to spend by 200 Ducats and increase the amount of Glory they have to spend by 11 Glory.
42	Tank-Splitter Sword	Change to: When you make an Injury Roll for an attack made with a Tank-Splitter Sword, determine if the target has an Armour Characteristic that is -1 or greater, or if it is wearing Armour or carrying a Shield. If it does, before rolling the dice for the Injury Roll, put one dice aside and turn it so that it shows a "6". Roll the rest of the dice, then return the dice you put to one side; it counts as having rolled a 6. In addition, attacks made with a Tank-Splitter Sword are not affected by the Dragonslayer Patron Skill (► see Patrons in the Trench Crusade Digital Rulebook).
44	Holy Warriors, Arise and be Healed! ACTION, 2nd sentence	Change to: If they do so, take a Risky Success Roll for the Holy Warrior.

Warbands of Trench Crusade Updates 1.0.2

Page	Location	Errata
54	Communicant	Remove Miracle of Regeneration and add REGENERATE 1 Keyword.
56	Ressurrection Ability, 1st sentence	Change to: If a Trench Pilgrim is killed after a game (► see Campaign in the Trench Crusade Digital Rulebook), they can be resurrected in the following Quartermaster Step as a Martyr Penitent with the Martyr Penitent Profile at a cost of 45 Ducats.
57	Stigmatic Nun	Add REGENERATE 1 Keyword and change Blessed Stigmata to: Each time you remove a BLOOD MARKER from a Stigmatic Nun because of the REGENERATE 1 Keyword, place 1 BLESSING MARKER next to the Stigmatic Nun.
59	Anchorite Shrine, Broken on the Wheel	Change to: Broken on the Wheel: At the start of each game, before deployment, you can say that one Trench Pilgrim or Ecclesiastic Prisoner will be broken on the wheel to show their piety and devotion. The model you choose is permanently removed from your Warband, but in a campaign you can redistribute their Battlekit to other models that would be allowed to have it in the following Quartermaster Step. Injuries that would be inflicted on the Anchorite Shrine are instead inflicted on its unfortunate victim, until the victim finally passes away. This is represented by the following special rules, which apply to the Anchorite Shrine until it suffers an Out of Action result on the Injury Table: It has an Armour Characteristic of 0 and does not have the NEGATE SHRAPNEL and TOUGH Keywords. It treats Down results as Minor Hit results. The first time the Anchorite Shrine suffers an Out of Action result on the Injury Table, it is treated as a No Effect result. When this happens, any BLOOD MARKERS on the Anchorite Shrine are removed, and from then on, these special rules no longer apply to the model, it has an Armour Characteristic of -3, and gains the NEGATE SHRAPNEL and TOUGH Keywords (the TOUGH Keyword will apply the next time the Anchorite Shrine suffers an Out of Action result on the Injury Table).
60	Catherine Wheel	Add DEADLY 1 Keyword and remove Mighty Blows special rule.
65	Gas Filters	Change Type to Special.
66	Grand Anchorite, Hallowed Anchorite, Holy Diesel Engine, and Piston Legs	Change Type to Special.
67	Sacred Geometry and Wrathful Cherub Face	Change Type to Special.
76	Alchemical Ammunition	Add AMMUNITION (+1 DICE), remove “models with Jezzail, Siege Jezzail, Alaybozan or Halberd-Gun only”, and change Guiding Path to: Guiding Path: Alchemical Ammunition can only be used with an Alaybozan, Halberd-Gun, Jezzail or Siege Jezzail (even though the Alaybozan has the SHRAPNEL Keyword). In a campaign, you cannot reallocate Alchemical Ammunition to another model.
78	M.U.R.A.D. Bombard, Echoing Blast	Change to: If the Success Roll for a Ranged Attack with an M.U.R.A.D Bombard that targets an enemy model is a Success or a Critical Success, or if the attack is a Failure and the target point scatters onto a model's base, apply the effect of the DEADLY Keyword to the Injury Roll for that model. All other models caught in the M.U.R.A.D. Bombard's blast radius, or that are in the M.U.R.A.D. Bombard's blast radius if it did not hit the target model or scatter onto a model's base, are taken Down (do not make an Injury Roll for them).

Warbands of Trench Crusade Updates 1.0.2

Page	Location	Errata
83	Sultanate Assassin Abilities	Change to: Temporal Assassin: After determining the Charge Bonus for a Sultanate Assassin that has not already carried out a Fight ACTION in its Activation, you can say that the Sultanate Assassin will split itself through time. If you do so, choose an additional enemy model as the target of the Charge (the normal rules for picking a target apply, but do not count targets of the Charge as interposing enemy models). Then make a charge move with the Sultanate Assassin which finishes within 1" of the first enemy model you picked as a target, and then take a Fight ACTION with the enemy model as the target. After resolving the Fight ACTION, you must immediately remove the Sultanate Assassin from the battlefield and redeploy it to within 1" of the other model that you picked. Then take a second Fight ACTION with the other enemy model as the target. The Sultanate Assassin must use the same Melee Weapon for both attacks, and cannot take a Fight ACTION later in the same Activation. Time Slip: If your opponent fails their Success Roll for an attack targeting a Sultanate Assassin, you can say the Sultanate Assassin will slip into a moment in the future. If you do so, you can redeploy it anywhere within 6" of its original location (measured from the centre of its base to the centre of its base), and more than 1" away from any enemy models. If the failed attack took place because the Sultanate Assassin is retreating, the retreat move ends after you redeploy the model.
85	Sultanate Sapper	Add the NEGATE MINED KEYWORD, remove Detonating Mines, add the Set Mine ability and change Defuse Mine and Forward Positions as shown below: Set Mine ACTION: A Sultanate Sapper can take a Set Mine ACTION if they are in contact with a terrain piece that measures up to 8" by 8" that doesn't have the MINED Keyword. If they do so, take a Success Roll for the model and add +2 DICE to the roll. If the roll is a Failure, nothing happens. If the roll is a Success or a Critical Success, the terrain piece gains the MINED Keyword. Defuse Mine: When you move a Sultanate Sapper into contact with a Marker or terrain piece with the MINED Keyword, you can say the Sultanate Sapper will halt and try to defuse the mine before it detonates (► see MINED). If you do so, take a Risky Success Roll for the model. If the roll is a Failure, the mine detonates anyway and the Sultanate Sapper's Activation ends. If the roll is a Success or a Critical Success, the mine does not detonate and the Marker or terrain piece loses the MINED Keyword. A model that sets a mine on a terrain piece can defuse the mine automatically if it moves into contact with the terrain piece (do not take a Risky Success Roll). Forward Positions: When you deploy a Sultanate Sapper for the first time in a game, you can deploy them up to 6" away from your deployment zone and in contact with a terrain piece that is at least ½" high.
90	Fida'i of Alamut, Master Assassin	Change to: A Fida'i of Alamut Warband must include 1 Master Assassin. The Master Assassin uses the Sultanate Assassin Warband Entry, except that it has the LEADER and TOUGH Keywords and has a cost of 95 Ducats.
91	Bow of Alamut, Keywords	Add the ASSAULT Keyword.
92	Golden Khanjar	Change the Limit to 2, remove the Attack Twice and add the CLEAVE 2 Keyword.
94	Chemistry and Alchemy	Change to: At the start of the first Turn of the game, before any models have been Activated, you can set up an Elemental Obstacle terrain piece that is up to 2" wide and 6" long. It must be set up more than 1" away from any other terrain pieces and more than 6" from any models. The Elemental Obstacle has the DIFFICULT TERRAIN and DANGEROUS TERRAIN (X) Keywords. After setting it up, you must say if X is the FIRE, GAS, or SHRAPNEL Keyword.
96	Additional Arm	Change to: This Takwin Homunculus adds the CLEAVE 2 Keyword to attacks made with its Pummelling Blows Ability.
97	Regenerative Tissue	Change to: This Takwin Homunculus gains the REGENERATE 1 Keyword.

Warbands of Trench Crusade Updates 1.0.2

Page	Location	Errata
97	Wings	Change to: Change this Takwin Homunculus's Movement Characteristic to 8"/Flying and give it the FLYING Keyword. A Homunculus cannot have the Wings Alchemical Formula if it has the Massive Size Alchemical Formula.
100	Anqā Guard	Add DEPLOYABLE Keyword.
100	Banner of Desert Wind, Sandstorm	Change to: Models that start an Activation within 24" of an enemy model that has the Banner of the Desert Wind have 1 subtracted from their Movement Characteristic until the end of the Activation. This rule does not apply if the model with the Banner of Desert Wind is Down.
102	Sultanate Grand Cannon	Add DEPLOYABLE Keyword.
108	Tartarus Claws	Change the Type to 2-Handed, add the CLEAVE 2 Keyword, and change Paired Weapons to: Harrowing Assault: If the target is taken Down or Out of Action by a Melee Attack made with Tartarus Claws, you can immediately move the model up to 3". You can use this move to move within 1" another enemy model, and if you do so, this model can take another Fight ACTION. However, it cannot make the 3" move again if the second attack takes the target Down or Out of Action.
109	Heretic Priest, Puppet Master, 4th sentence	Change to: If the roll is a Success or Critical Success, pick 1 model (friend or foe) that is within 12" of the Heretic Priest and in their Line of Sight, apart from the Heretic Priest themselves.
113	War Wolf Assault Beast	Add NEGATE DIFFICULT TERRAIN Keyword and change Loping Dash to: Add +1 DICE to the Risky Success Roll for a War Wolf taking a Dash ACTION.
117	Infernal Bomb, Infernal Strike	Change to: If the Success Roll for a Ranged Attack with an Infernal Bomb that targets an enemy model is a Success or a Critical Success, or if the attack is a Failure and the target point scatters onto a model's base, apply the effect of the DEADLY Keyword to the Injury Roll for that model. Injury Rolls for other models caught in the Infernal Bomb's BLAST are made normally.
118	Slow special rule	Change to: Slow and Creeping: Treat a Trench Ghost model as having a Movement Characteristic of 3"/Infantry when it takes a Dash ACTION. In addition, add -1 DICE to the Success Roll for an attack made by a Trench Ghost model on an enemy model that is making a Retreat.
121	Golden Calf Altar	Remove CONSUMABLE Keyword, add DEPLOYABLE Keyword and change the Illusions special rule to: Enemy models treat Open ground and all terrain within 3" of a model with a Golden Calf Altar as being Difficult terrain (if it is not already), even if they have the FLYING Keyword.
131	Grail Devotee, Jealous Obsession	Add: Grail Devotees cannot be reallocated unless the model that had them is removed from the Warband Roster.
134	Lord of Tumours, Crushing Blows	Change to: A Lord of Tumours can make a Crushing Blows Melee Attack even if it does not have any Melee Weapons, or instead of using any Melee Weapons that it has. If it does so, this Melee Attack has the CLEAVE 2 Keyword.

Warbands of Trench Crusade Updates 1.0.2

Page	Location	Errata
137	Grail Thrall Keywords	Add FLYING (Fly Thralls only) Keyword.
139	Herald of Beelzebub	Add FLYING Keyword and remove option of having a Grail Devotee.
140	Amalgam Battlekit	Change to: An Amalgam has six arms, which allows it to carry a vast combination of different Ranged and Melee Weapons. It can have up to six Ranged or Melee Weapons from the Black Grail Armoury. In addition, an Amalgam can treat two 2-Handed Weapons with the HEAVY Keyword (regardless of whether they are Ranged or Melee Weapons) as 1-Handed Weapons instead of the single 2-Handed Melee Weapon granted by the STRONG Keyword. Remaining 2-Handed Weapons count as two weapons towards this total. An Amalgam cannot have the same Weapon more than twice and it cannot have Grenades. An Amalgam may have up to 1 Trench Shield in place of one of its 1-Handed Weapons, but it does not benefit from the Shield Combo rule. It cannot have any other Battlekit.
142	The Executor	Change to: A Dirge of the Great Hegemon Warband must include 1 Executor. The Executor uses the Plague Knight Warband Entry, except that it has a Ranged Characteristic of +1 DICE and the LEADER and TOUGH Keywords, and has a cost of 80 Ducats. The Warband can still include 0-2 Plague Knights.
147	Goetic Spells	Change the bullet points to: * A model cannot cast the same spell more than once per Activation. * To cast a Goetic Spell, you must remove a number of BLOOD MARKERS from models equal to the spell's cost. You can remove the BLOOD MARKERS from any models (friend or foe) that do not have the BLACK GRAIL or DEMONIC Keywords. The models can be anywhere on the battlefield and do not have to be in the spell caster's Line of Sight, and the spell cost can be paid by removing BLOOD MARKERS from more than one model if you wish. * If the cost of a Goetic Spell is a range of numbers, you must choose how many BLOOD MARKERS you will pay before the spell is cast. For example, if a Goetic Spell had (Cost 1-3), you must pay a cost of 1, 2 or 3 BLOOD MARKERS before you cast the spell. * A model that is casting a spell is called the spellcaster. * Some Goetic Spells can only be cast if a model takes a Cast Spell ACTION. When it does so, you must pay the spell cost as described above, and you can then cast the spell with the model. You can use the Cast Spell ACTION more than once per Activation, as long as you do not cast the same spell more than once.
151	Malebranche Sword	Add the DEADLY Keyword and remove Abyssal Blade.
159	Charm of Acedia, 2nd sentence	Change to: If you do so, if the next ACTION the spellcaster takes as part of this Activation requires one or more Success Rolls or Risky Success Rolls for any part of it, the first roll is automatically a Success (do not roll any dice).
160	Uncaring Gluttony	Change to: You must take a Cast Spell ACTION with the spellcaster in order for it to cast this spell. If you do so, pick 1 enemy model that has not yet been Activated this Turn, and pick one piece of Equipment that the model has (note its Type must be Equipment, not Weapon or Special and so on). Equipment that has the CONSUMABLE Keyword cannot be picked as it has already been consumed, and Equipment that has the DEPLOYABLE Keyword cannot be picked if it is more than 1" away from the model. The model chews on the Equipment, rendering it unusable for the rest of the game.
162	Praetor Keywords	Add the FLYING Keyword.
163	Sorcerer Keywords	Add the FLYING Keyword.

Warbands of Trench Crusade Updates 1.0.2

Page	Location	Errata
165	Left-Hand Path spell, 1st sentence	Change to: You can cast this spell when the spellcaster takes a Move, Dash or Charge Action and moves into contact with a terrain piece.
168	Poison Stingers	Change to: A Pit Locust can make a Melee Attack with the CLEAVE 2 and SHRAPNEL Keywords even though it does not have a Melee Weapon.
168	Pit Locust Keywords	Add the FLYING Keyword.
170	Desecrated Saint, Aura of Envy	Change to: Enemy models within 12" of the Desecrated Saint cannot charge enemy models that are within 1" of a model from the charging model's own Warband (it is allowed to move around them in order to reach a different target and does not treat them as an interposing enemy model).
175	Communicant Anti-Tank Hunter	Add the REGENERATE 1 Keyword and remove Miracle of Regeneration.
176	Iron-Clawed Hands	Change to: A Goetic Warlock can make a Melee Attack with the CLEAVE 2 and CRITICAL Keywords even though it does not have a Melee Weapon. In addition, the Off-Hand Weapon modifier applies to the second attack.
179	Mamluk Faris Battlekit	Change to: A Mamluk Faris always has Reinforced Armour, a Combat Helmet, and a a Jezzail with Alchemical Ammunition from the Iron Sultanate Faction List (► see Iron Sultanate Battlekit). In addition, a Mamluk Faris always has either a Greatsword, or a Polearm and a Trench Shield, or a Pistol and a Sword/Axe. Decide which Battlekit the Mamluk Faris has upon recruitment, and you can swap the loadout in each Quartermaster Step. The Mamluk Faris has an Armour Characteristic of -3 if it has a Trench Shield and an Armour Characteristic of -2 if it does not.
181	Observer, Lightning Speed	Change to: An Observer's Polearm has the CLEAVE 2 Keyword.
